

Thermo-T MAX™

The ThermoT-Max label works as a color-changing visual indicator measuring the highest temperatures reached throughout equipment operation. This color-locking label ranges from 50C – 100C and shows the temperature gradients in 5-degree stages to give a more exact reading on how high the equipment reached.

Benefits

Fast, easy, and inexpensive to install.

Gives a clear visual reading for maximum temperatures reached during equipment operation.

Allows you to monitor, review, and analyze temperature trends.

Instructions for use:

Peel indicator from release paper. Apply to any clean, grease free surface ensuring that the indicator has adhered to the surface. The highest red indicates the current temperature within its range.

*Store in cool dry place below 65 Degrees F

*Not Suitable for long term exposure above 194 Degrees F
